LONG SPAN SHELVING

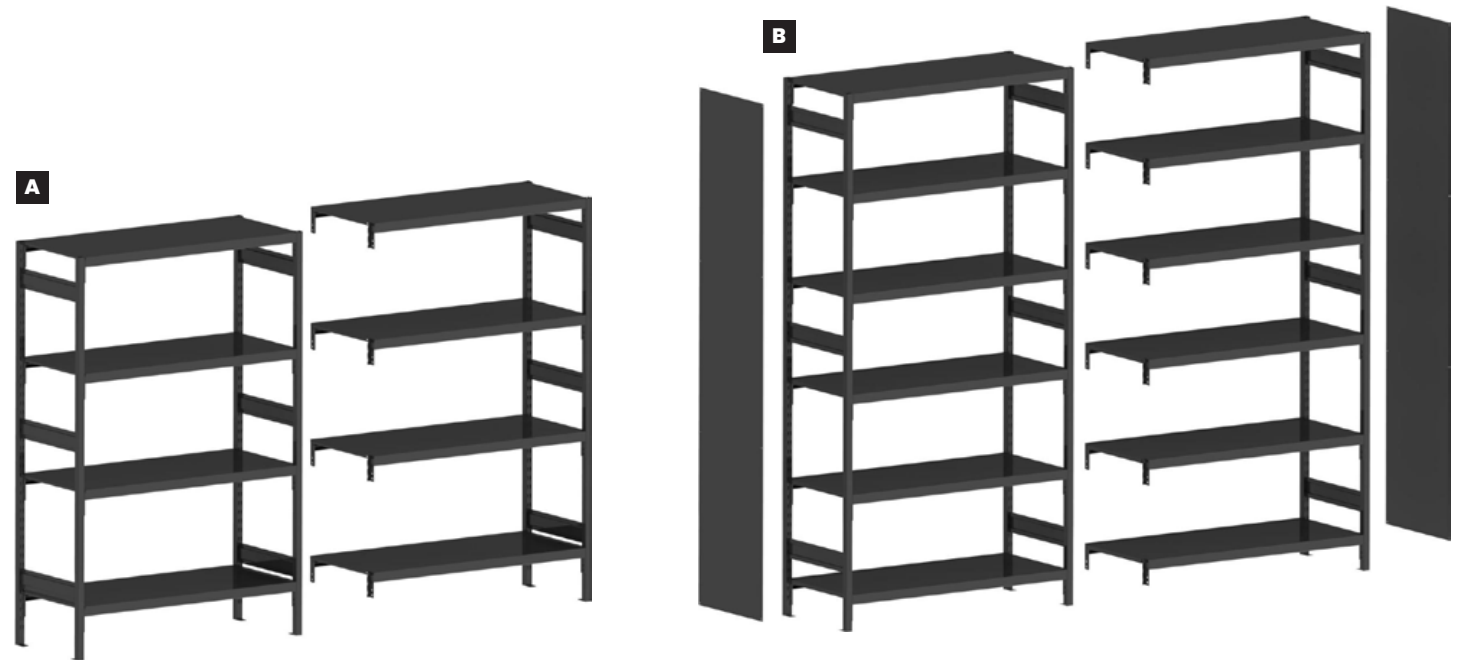

GONDOLA
- SHELVING -

Widely used in supermarkets, liquor, hardware, stationery and cold rooms Gibson Long-Span Shelving is best anywhere that strong and efficient racking is required.

Tested by the National Bureau of Materials Handling, Gibson Long Span Shelving can safely bear 650kg (evenly distributed) when heavy duty rails are used, and 350kg (evenly distributed) when light duty rails are used. This means that those heavy weight items like paint, copy paper, canned food and motor parts can be held and displayed on URI rack in complete safety.

A 1800mm high long span shelving
ideal for coldrooms

B 2400mm high long span shelving
