ABOUT US

Gibson Retail Solutions has been operating out of Australia for over 80 years and continues to be well respected.

Many of our major customers have been with us through our journey and we have become strategic partners in the expansion and growth of their brands. During this time, we have also been making a positive inroad into the international market, including South-East Asia, Japan, New Zealand, Europe and USA.

The business was sold in 2016 to a prominent Chinese manufacturing company, Shan Young Group, which has given us a competitive edge through vertical integration.

We are now one company, which means you can take advantage of sourcing direct from overseas without the concern of additional costs or overheads. Our sourcing capabilities in China are unsurpassed, allowing us to provide our customers with value-add solutions at a cost-effective price.

Gibson's have generated significant savings for our clients through our supply out of China, also reducing warehouse costs by storing product in China with a 3-4-week delivery (shipping time).

We're not here just to meet customer expectations, we're here to exceed them - through innovation in design, speed to market and a strong competitive advantage.

Design & Innovation

Our point of difference is our dedication to innovation in design, our international experience works hand in hand with our 90 years of servicing the Australian retail market. This allows us to design products which are functional and at the cutting edge of design. In fact, we invest in travelling the world to find ideas that can be tailored specifically for the Australian market.

Manufacture

We are proud to have one of the most versatile manufacturing facilities in our industry, situated in Pinghu Zhejiang Province (Greater Shanghai Area). We also have several associated companies that work under the Shan Young umbrella that can supply, lighting, furniture, signage, acrylic etc.

Prototype

We pride ourselves in our ability to produce prototypes with speed and accuracy, we understand the importance of a prototype and continually track the manufacturing process to ensure the best result. Our years of experience help us to cost engineer the prototype to ensure that the product we deliver is also manufactured in the most cost-effective way.

Supply

As a major supplier to the Australian retail market, we fully understand the importance of 'Speed to Market' and our business has been built around this offer. To expedite this further we can manufacture and store in China, delivering what is needed immediately with the balance of the product dispatched as needed.

**SYS70
CANTILEVER
GONDOLA**

Why Choose SYS70 Cantilever Gondola?

Our SYS70 Gondola is made up of a series of upright posts, infill panels, shelving and accessories. Shelving in your store can be made up with a series of single sided bays, double sided bays and feature ends. All rows of shelving begin with a start bay and continue with an add bay.

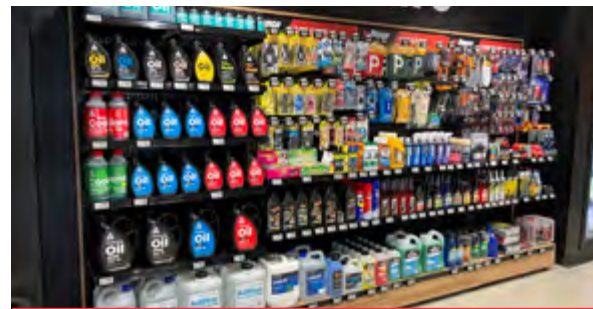

Features include:

- Toolless assembly (only require a spirit level)
- Non-outrigger design - no front posts on the shelving line
- Fully modular system - begin with a start bay and expand with add bays. Easy to reconfigure when your store grows or changes layout.
- Option of heights and leg depths
- Heavy-duty construction - powder-coated steel uprights & shelves rated for grocery, liquor and hardware loads. Flat-packed for easy freight.
- LED lighting ready - plug and play LED system can be easily added without extra structural work.
- Extensive accessory range including hooks, wire baskets, dividers, shelf fronts, magazine holders, pelmet brackets and more — all SYS70 compatible.

Supermarkets & Grocery

High-traffic aisles, frequent restocking and heavy grocery loads.

Automotive Stores

Compact layout maximises SKU count per square metre.

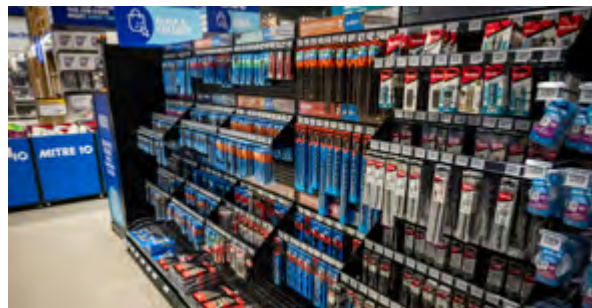

Liquor & Bottle Shops

Heavy-duty shelves; compatible with bottle cradles and wine inserts.

Variety & Discount Stores

Flexible bay widths and shelf depths suit mixed merchandise.

Hardware & Trade Supply

Industrial loads; hooks and bin accessories available.

Convenience & Petrol Stores

Proven in compact high-turnover forecourt retail environments.

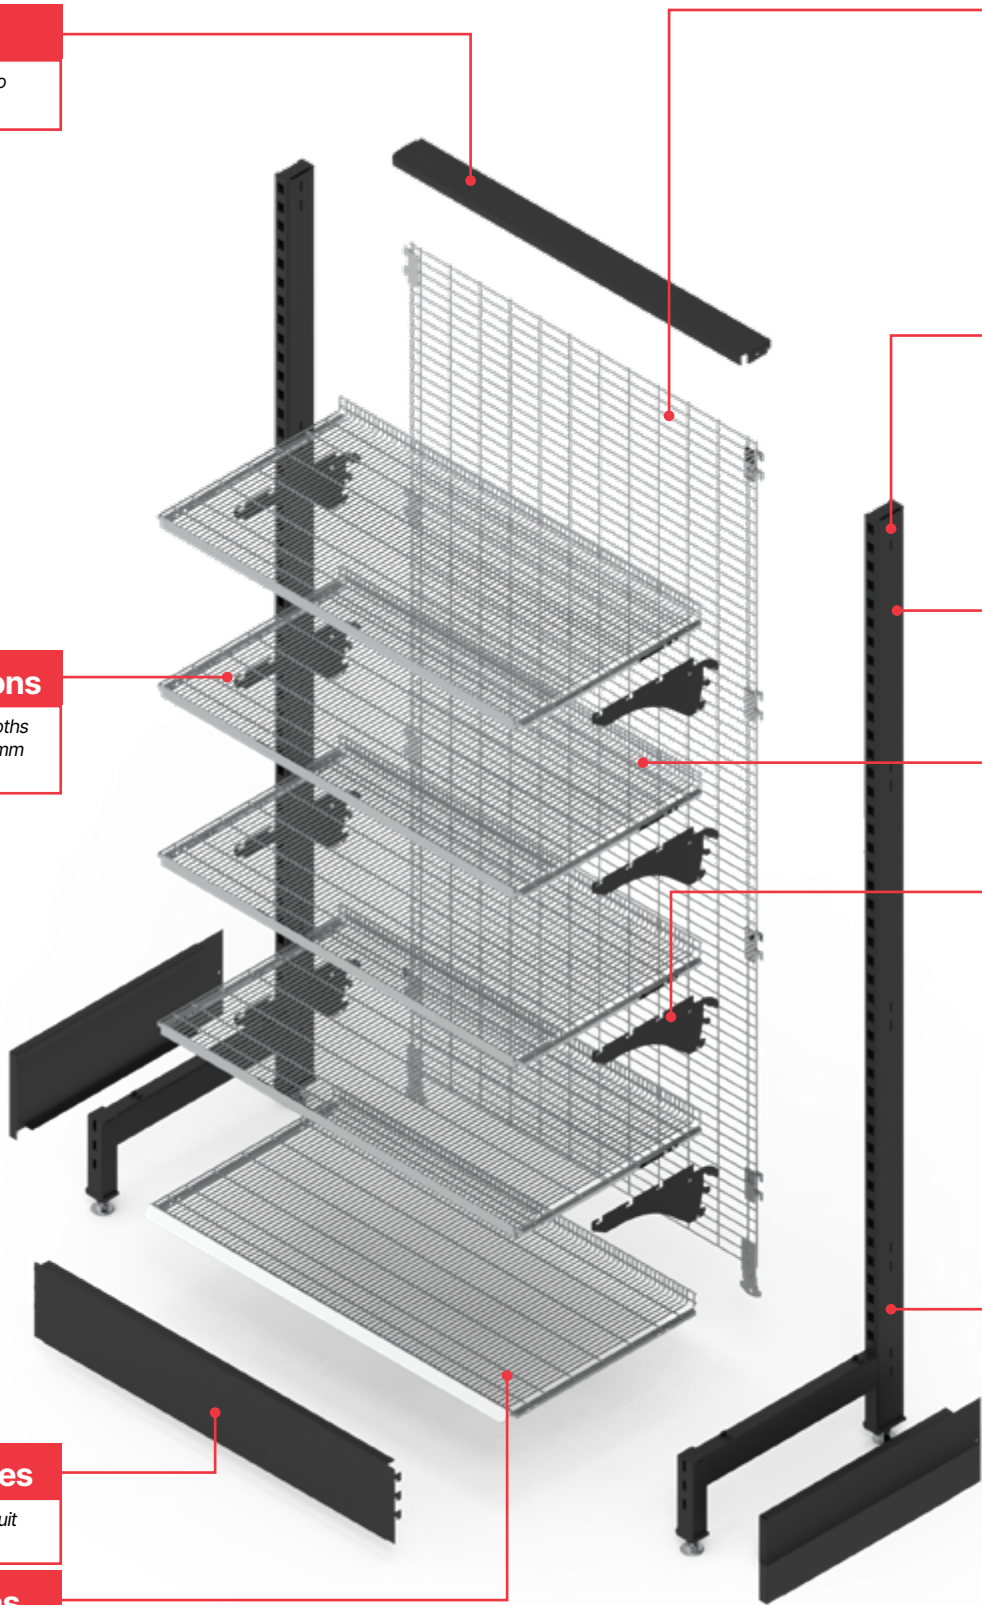

Product Overview

Optional Top Cap
Tap cap provides a clean finish to your gondolas.

Shelf Depth Options
Wire Shelves - 405, 470mm depths
Steel Shelves - 305, 405 & 470mm depths

Optional Kickplates
Front, LH and RH kickplates to suit 400 & 470mm post legs.

Bay Width Options
Available in a 915 and 1200mm bay widths.

Strength & Stability
Our shelving is engineered and manufactured to exceed industry standards, incorporating additional wires and stiffeners for increased strength and durability. Both wire and steel shelves are load-rated to 100kg per shelf.

Posts Heights
Choose from single and double sided 1169, 1415, 1990 and 2150mm high posts

Multi Angle Brackets
Brackets are adjustable in flat, 15 and 30 degrees angles.

Single Piece Welded Posts
Post legs are welded to uprights for maximum durability, strength and ease of installation. They are available in 400mm and 470mm deep depths.

Infill Panel Options
Available in a choice of mesh, and punch infill panels.

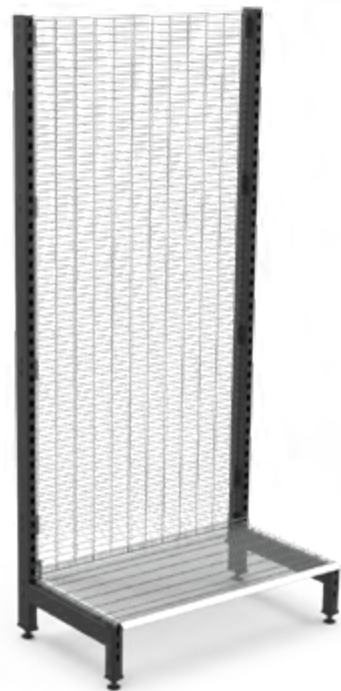

Finish Options

Satin Black Standard Finish	Oyster Grey Standard Finish
Antique Silver Made to Order Finish	Hammer Tone Grey Made to Order Finish

Shelf Type Options

Wire Shelf	Steel Shelf

OUTRIGGER GONDOLA SYSTEM

Why Choose Outrigger Gondolas?

What is outrigger shelving for supermarkets?

Our range of outrigger shelving system is a robust and versatile system that is a go to for retailers that are looking for functional and versatile option to maximise their display.

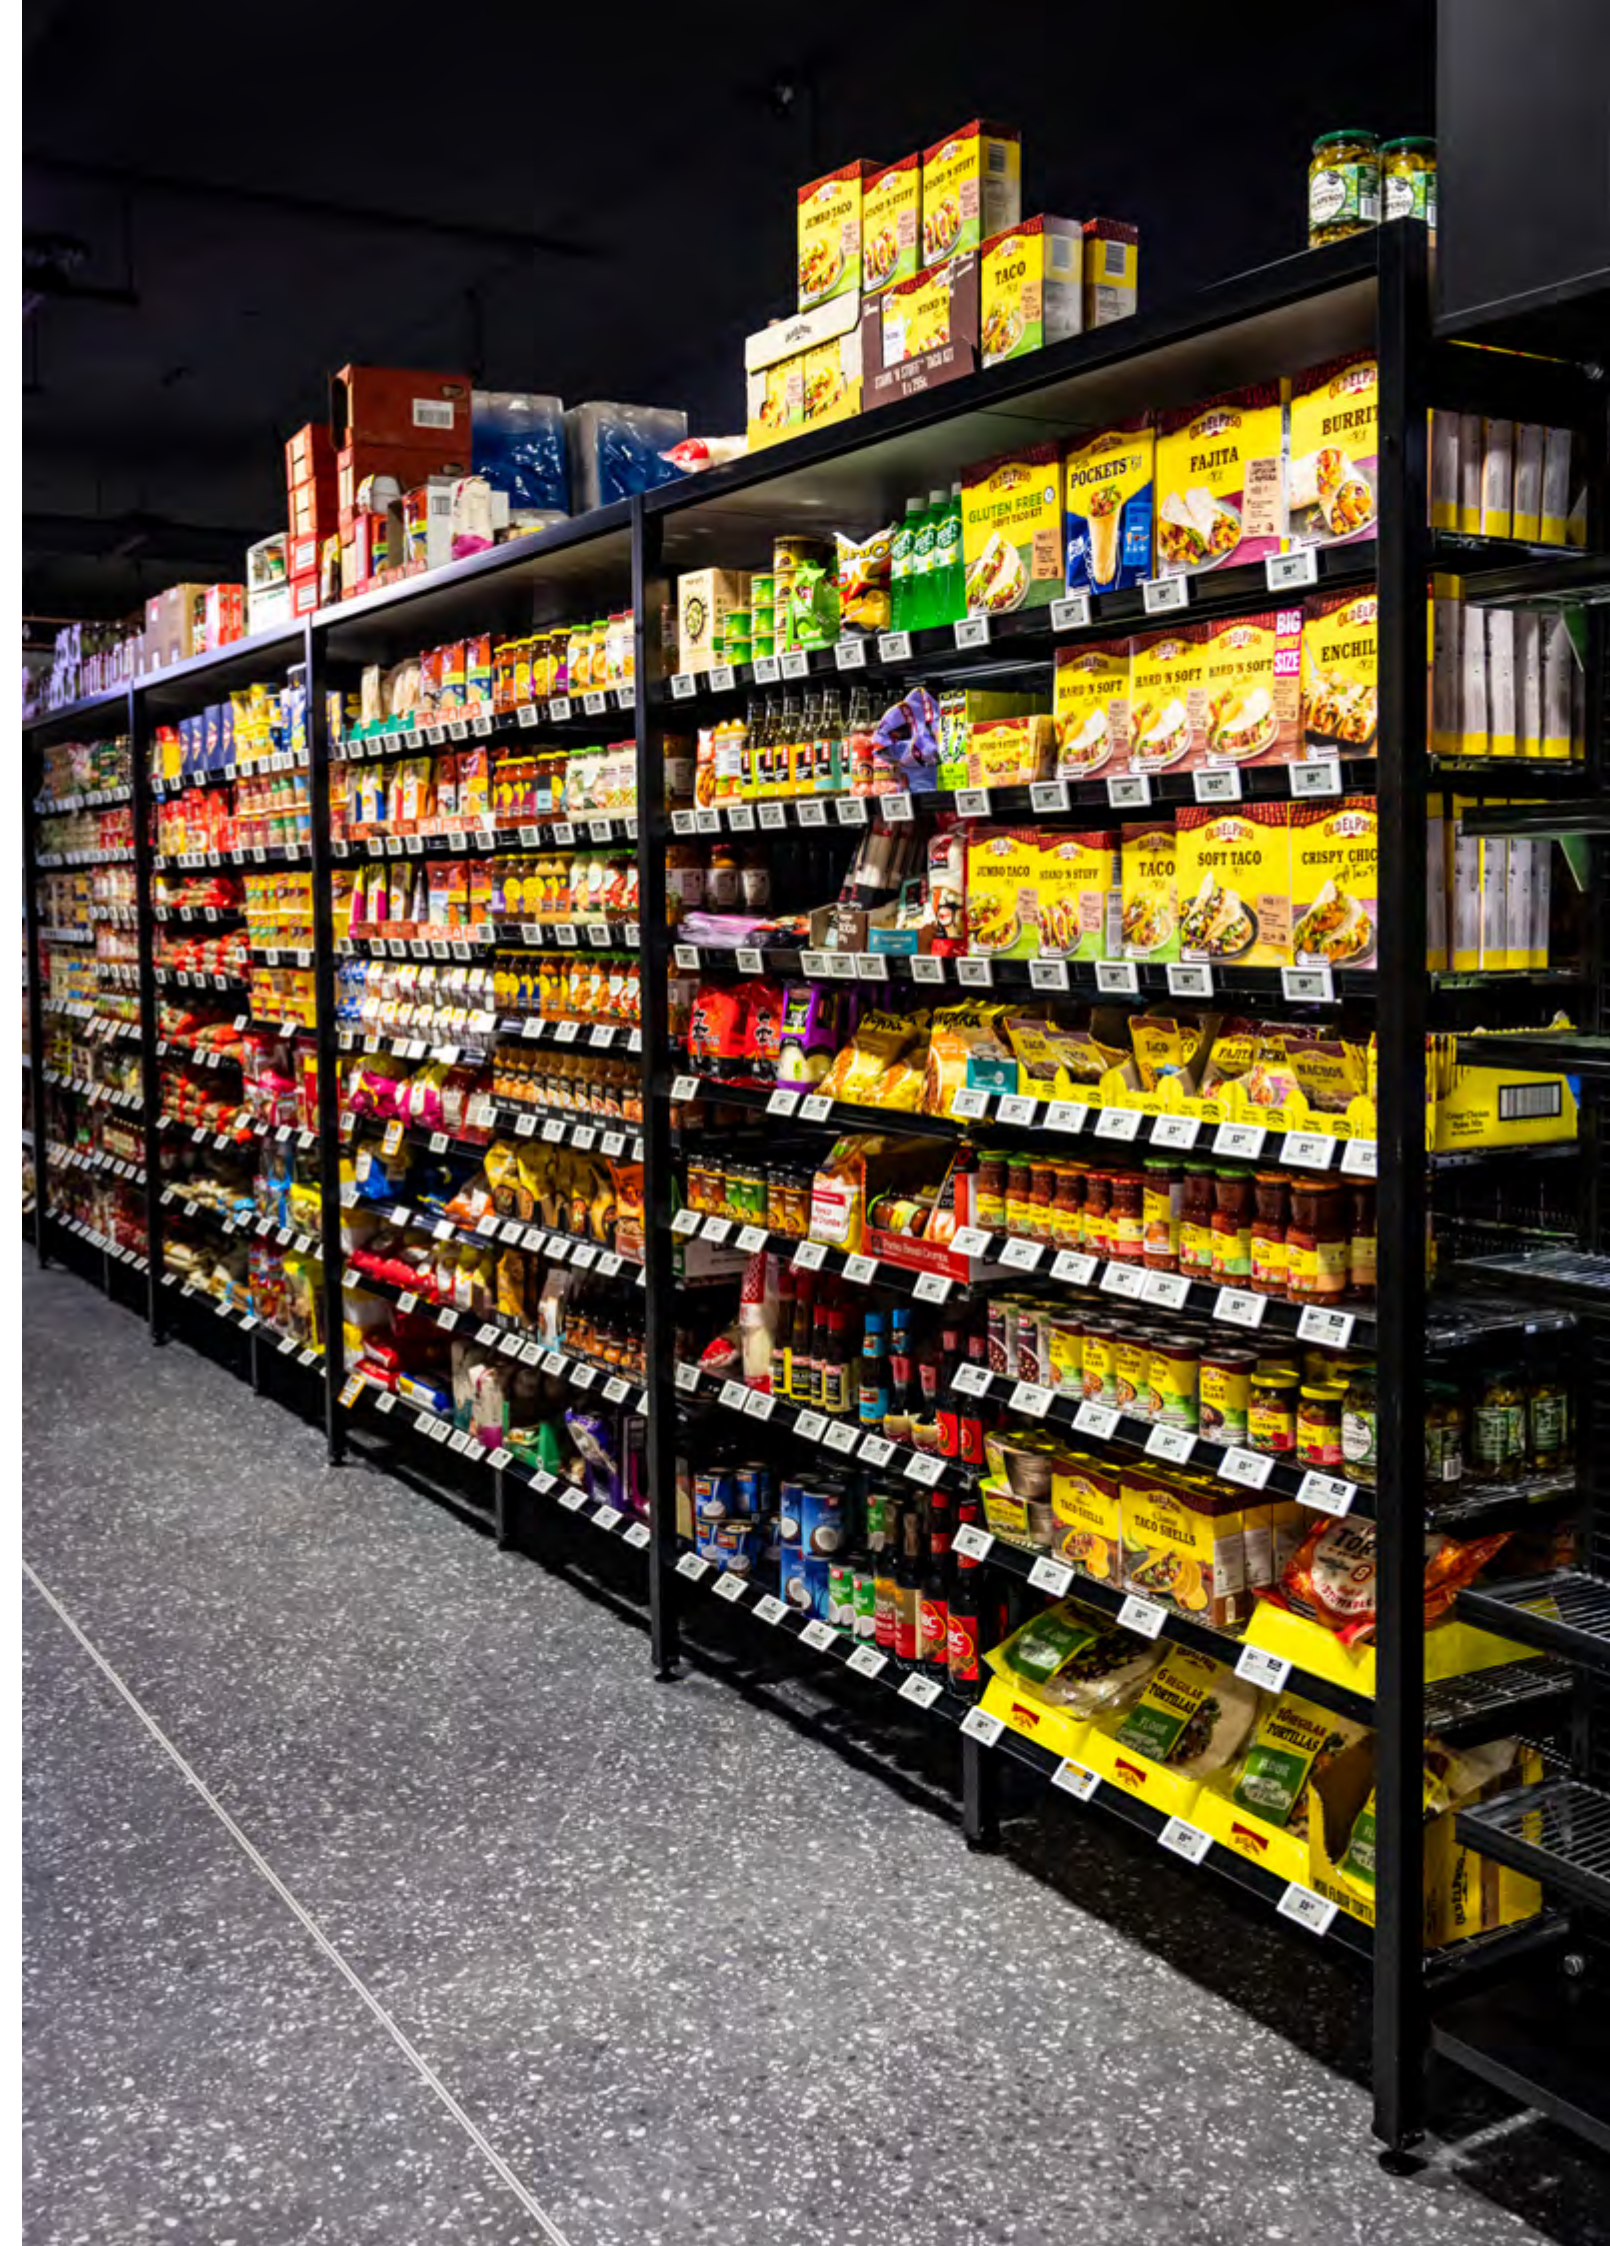

Outrigger is the perfect supermarket shelving solution in any retail store, supermarket, convenience store, variety store, party supplies shop, grocery store and even petrol stations.

It is a freestanding metal shelving system that is cost effective, modular and comes in an array of size options and accessories to suit your individual needs.

Outrigger supermarket shelving has the benefit of allowing a larger storage capacity on the overhead shelf. The upright front posts allow for a effective segmentation across ranges and categories in your store.

Features include:

- Cost Effective
- Easy assembly and adjustment
- Flat-packed for transport
- Modular to allow for expansion as required
- Single Sided or Double Sided
- High or Low profile posts
- Option of bay width
- Option of rear panels

Product Overview

Overhead Storage Shelf

Overhead storage shelf ideal for storing overstock items

Front Support Rail

Front Support Rail provides maximum support to keep the outrigger as stable as possible even under heavy loads.

Shelf Depth Options

Wire Shelves - 405, 470mm depths
Steel Shelves - 305, 405 & 470mm depths

Bay Width Options

Available in a 915 and 1830mm bay widths.

Strength & Stability

Our shelving is engineered and manufactured to exceed industry standards, incorporating additional wires and stiffeners for increased strength and durability. Both wire and steel shelves are load-rated to 100kg per shelf.

Multi Angle Brackets

Brackets are adjustable in flat, 15 and 30 degrees angles.

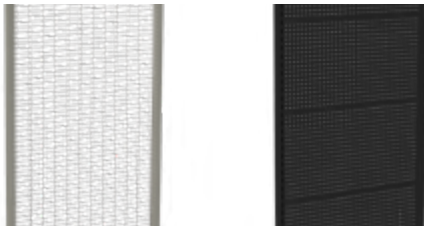

Single Piece Welded Frame

Frames are welded as single piece for maximum durability, strength and ease of installation. They are available in double and single configurations.

Infill Panel Options

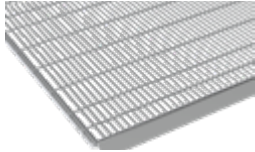

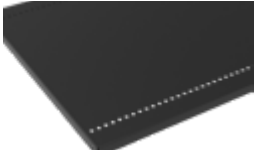

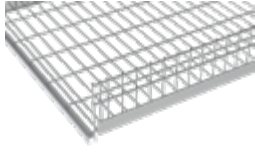

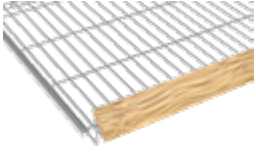

Available in a choice of mesh, and punch infill panels.

Finish Options

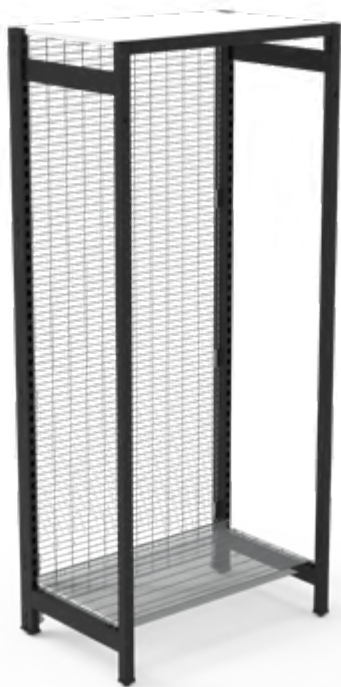

Satin Black Standard Finish	Oyster Grey Standard Finish
Antique Silver Made to Order Finish	Hammer Tone Grey Made to Order Finish

Shelf Type Options

 Wire Shelf	 Steel Shelf
 Reversible Wire Basket	 Bread Shelf + Timber Front
 Crate Shelf	 Crate Shelf + Acrylic Front

VHD GONDOLA SYSTEM

Why Choose VHD Gondolas?

What is VHD shelving? Our very heavy duty shelving system is a robust and versatile system that is a go to for retailers that are looking for functional option to maximise their display. VHD Shelving is the perfect shelving solution in any retail store, supermarket, convenience store, variety store, party supplies shop and grocery store. It is a freestanding metal shelving system that is cost effective, modular and comes in an array of size options and accessories to suit your individual needs. VHD shelving has the benefit of allowing a larger storage capacity on the overhead shelf with a clean look without outrigger frames.

Features include

- Cost effective – less components than traditional outrigger system
- Reinforced upright post for extra strength & stability
- Welded top shelf support for safe handling of overhead stock
- No outrigger front posts interrupting shelf lines.
- Fast & easy assembly and adjustment
- Flat-packed for transport
- Modular to allow for expansion as required
- Single Sided or Double Sided
- Option of rear panels

Product Overview

Overhead Top Shelf

Overhead top shelf ideal for storing overstock items.

Shelf Depth Options

Wire Shelves - 405, 470mm depths
Steel Shelves - 305, 405 & 470mm depths

Bay Width Options

Available in 915mm width.

Strength & Stability

Our shelving is engineered and manufactured to exceed industry standards, incorporating additional wires and stiffeners for increased strength and durability. Both wire and steel shelves are load-rated to 100kg per shelf.

Heavy Duty Post

VHD posts are internally reinforced for maximum strength and stability compared to industry standards.

Multi Angle Brackets

Brackets are adjustable in flat, 15 and 30 degrees angles.

Single Piece Welded Frame

Post legs and overhead top shelf storage are welded as single piece for maximum durability, strength and ease of installation. They are available in double and single configurations.

Mesh Infill Panel
